

A pair of tangents are drawn from Point A to a circle such that the cord made by the contact points of tangents B and C, makes an angle of 120° at center. A line is drawn through the center O and point B meets the circle at D. Let there be a point P on the circle such that $BP = 5$ units and the area of the triangle BPO is 30 sq. unit. Find the area of ABDC.

☐ 120/3 sq. unit

☐ 120/4 sq. unit

☐ $169\sqrt{3}/4$ sq. unit

☐ $169/2$ sq. unit

Previous Question

Next Question

Consider the following six step process:

Step 1: Divide by 4

Step 2: If less than 30, go to Step 3 and continue from there, otherwise proceed to Step 4

Step 3: Add 12

Step 4: Add 3

Step 5: Multiply by 3

Step 6: Subtract 40

Which starting value produces the even number result for the above process?

☐ 56

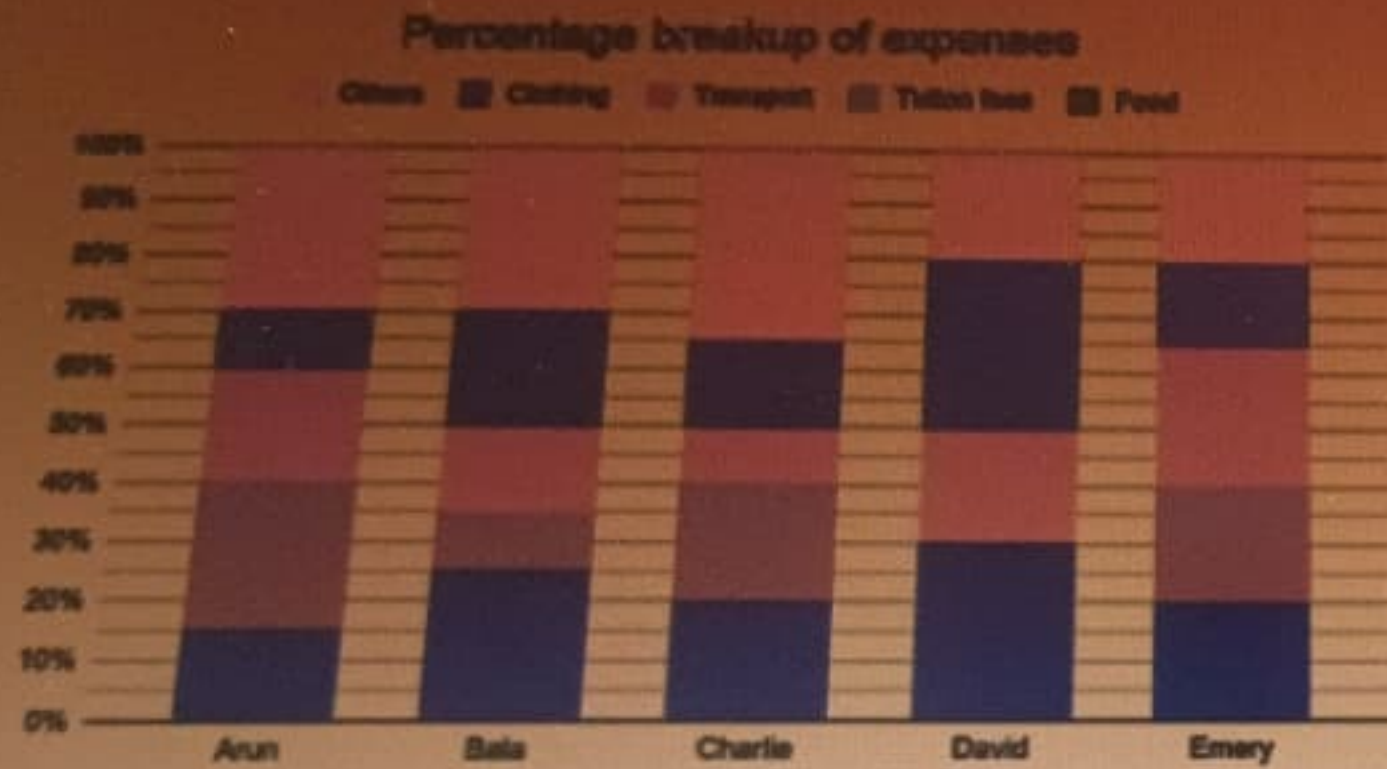

☐ 48

☐ 40

☐ 62

Direction: Study the information given below and answer the question that follows.

The bar graph below shows the percentage breakup of expenses of five people Arun, Bala, Charlie, David and Emery.

Question: If the sum of expenses of Bala on tuition fees and transport together was Rs 1200, then what was his expense on clothing?

☐ Rs 720

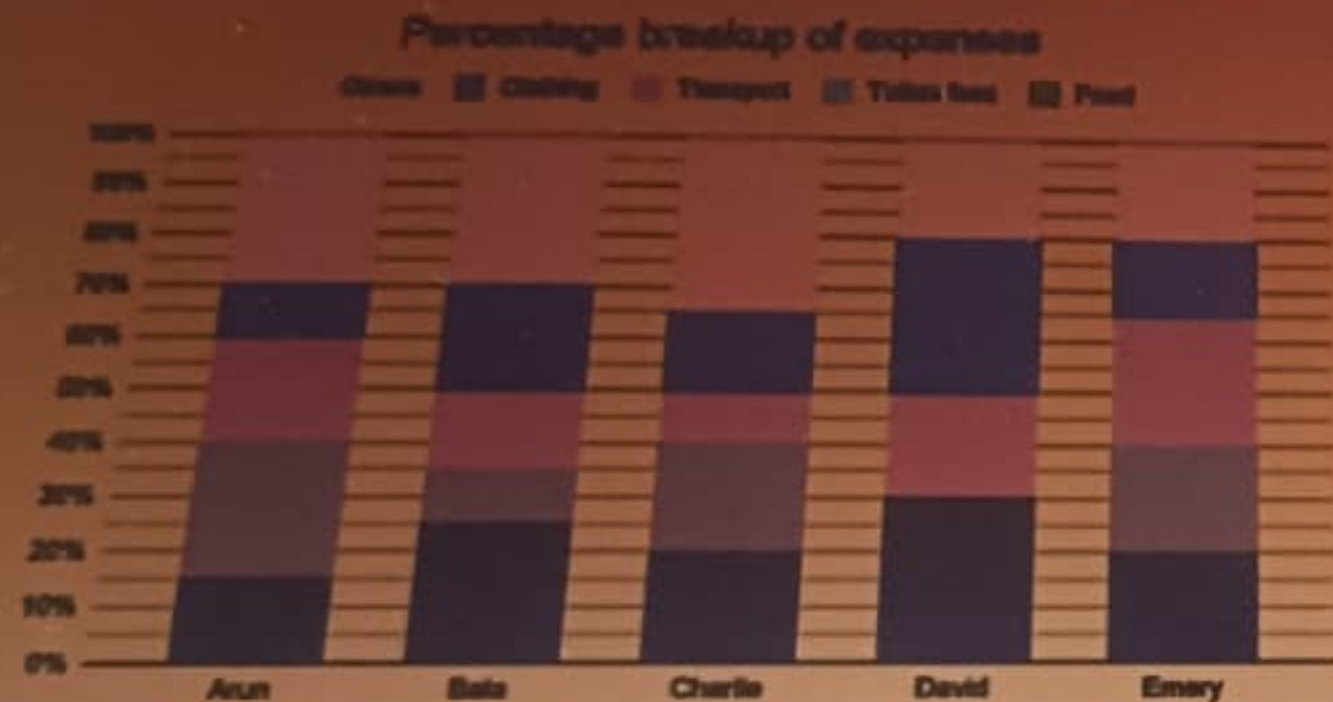

☐ Rs 960

☐ Rs 780

☐ Rs 800

Directions: Study the information given below and answer the question that follows.

The bar graph below shows the percentage breakup of expenses of five people Arun, Bala, Charlie, David and Emory.

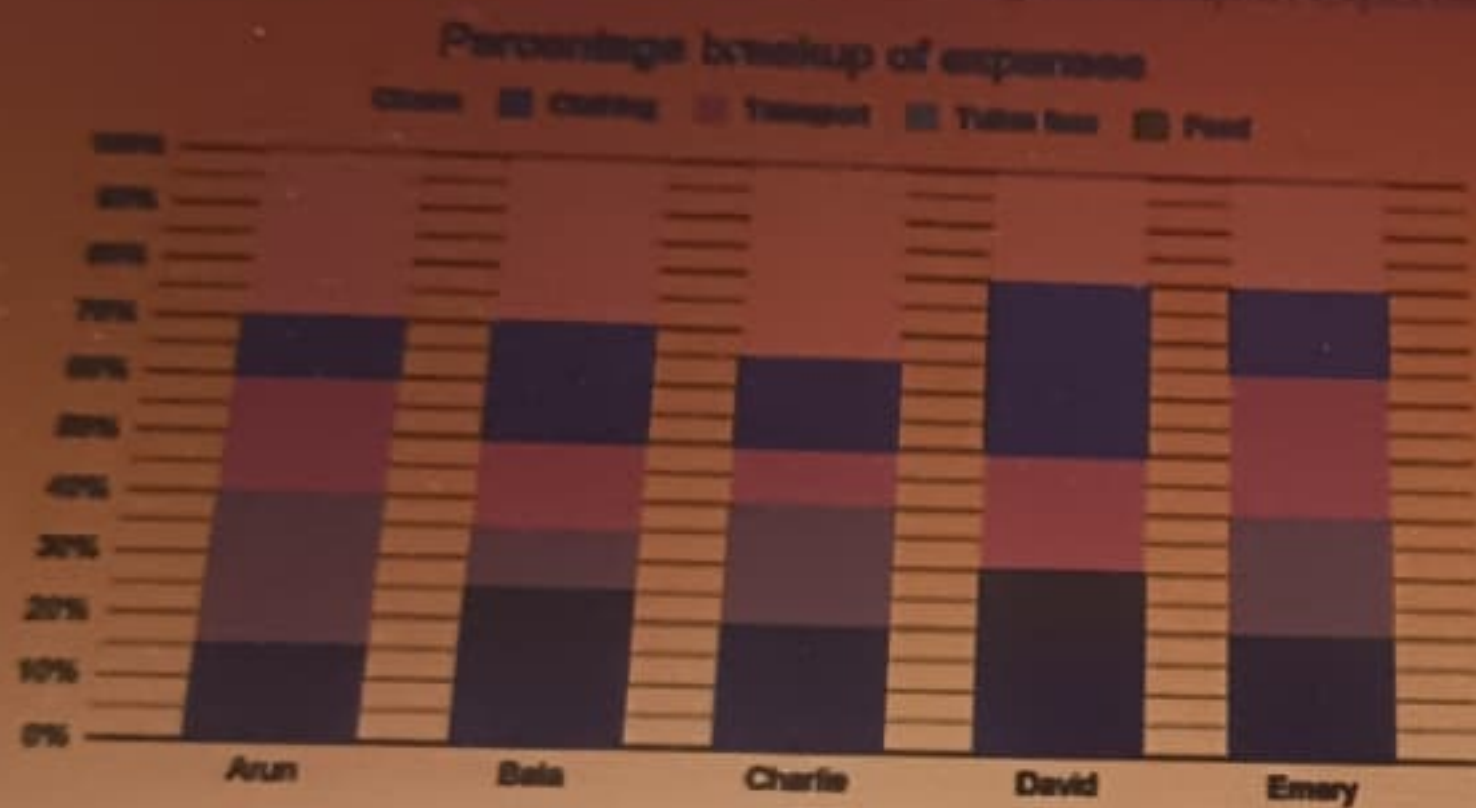

Question: Sum of expenditure of Arun on food and Bala on transport is Rs 4500. What is the sum of expenditure by Arun on clothing and B

☐ Rs 2500

☐ Rs 4000

☐ Cannot be determined

☐ Rs 3000

Question: If the total expenses of Bala and Charlie are in the ratio of 3 : 5, then what is the ratio of their 'other' expenses

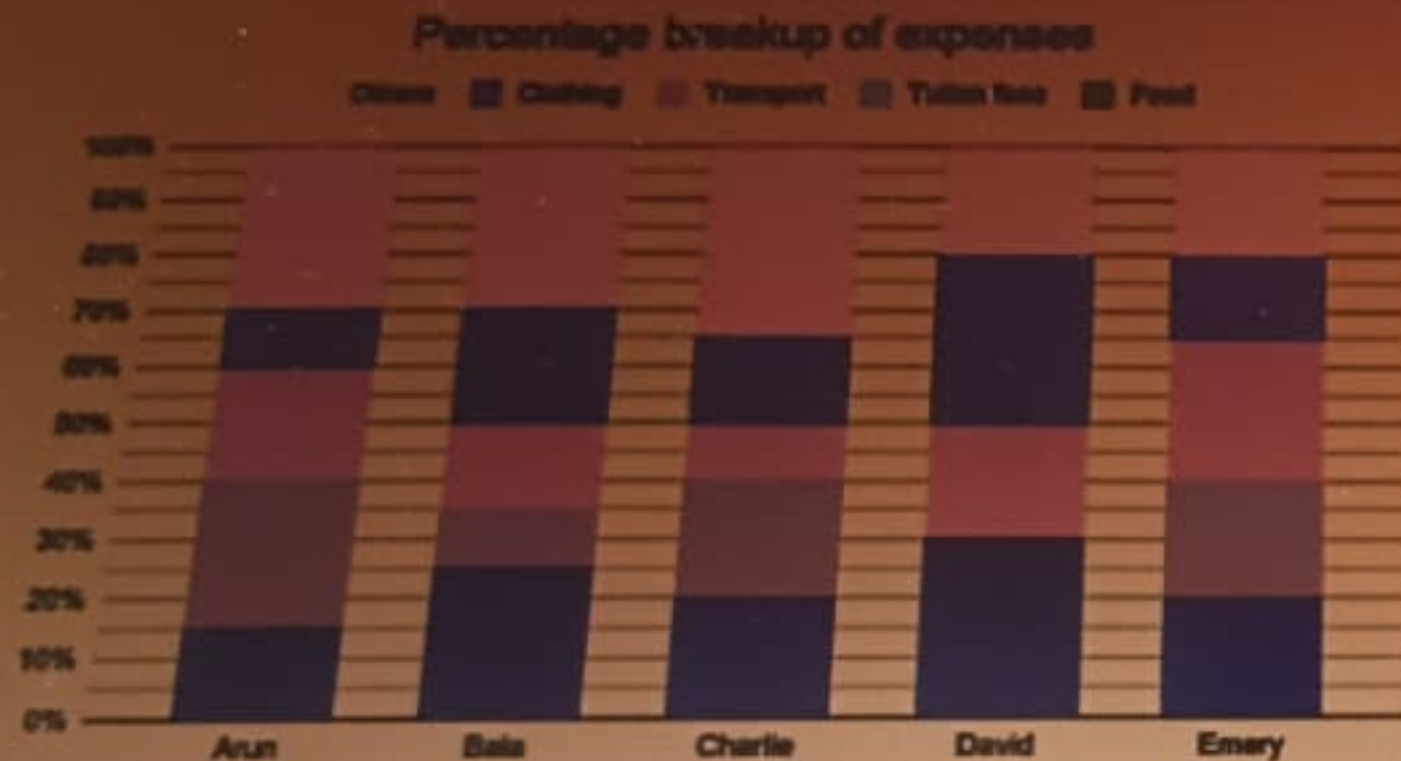

☐ 7 : 11

☐ 18 : 35

☐ 14 : 19

☐ 3 : 5

The bar graph below shows the percentage breakup of expenses of five people Arun, Bala, Charlie, David and Emery.

Question: If the total expenses of Bala and Charlie are in the ratio of 3 : 5, then what is the ratio of their 'other' expenses?

☐ 7 : 11

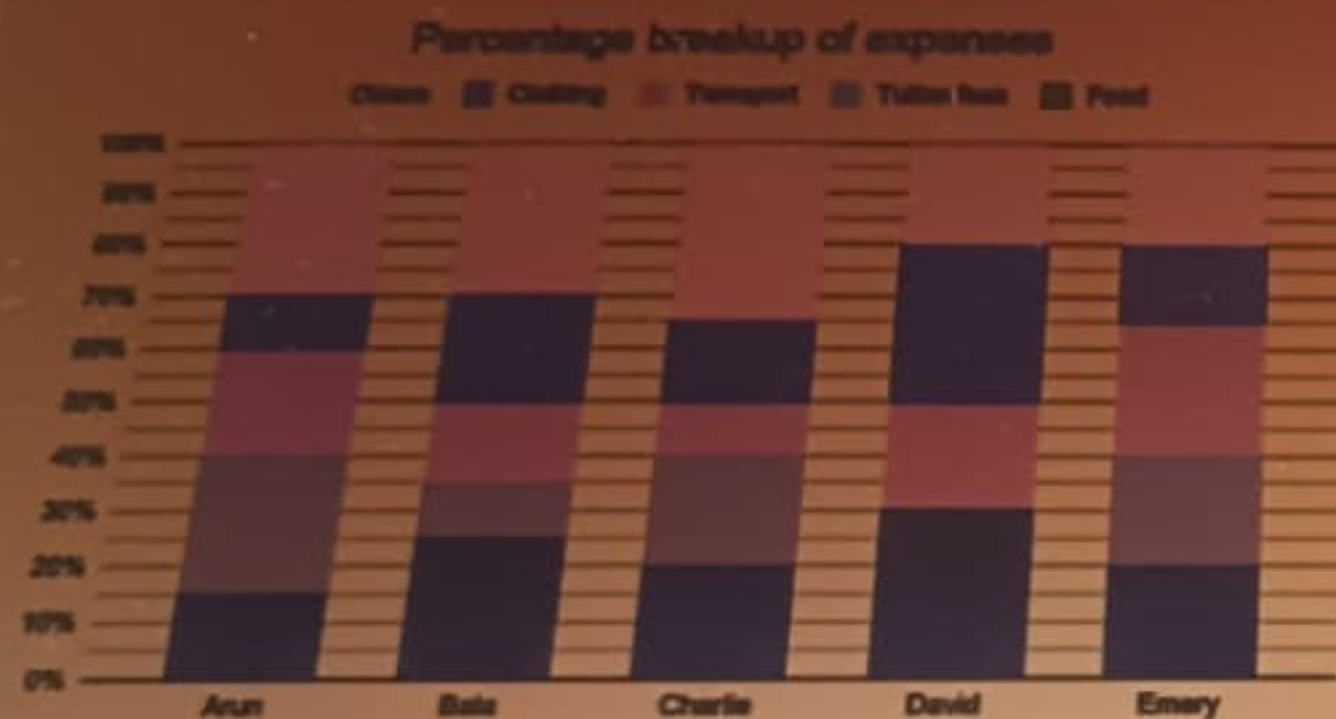

☐ 18 : 35

☐ 14 : 19

☐ 3 : 5

Directions: Study the information given below and answer the question that follows.

The bar graph below shows the percentage breakup of expenses of five people Arun, Bala, Charlie, David and Emery.

Question: If David spends 15% more on transport than Emery on clothing, then the total expenses of David is what percentage more / less than

☐ 16.25% more

☐ 13.75% less

☐ 16.75% less

☐ 13.75% more

What will come in the position of 'W' in the alphanumeric series G5Q, F9R, E13S, #?

D19T

D17T

D21T

Between 4 and 5 o'clock, when are both the hands of a clock at the right angle?

☐ 25(5/55) minutes past 4

☐ 10(10/55) minutes past 4

☐ 35(12/55) minutes before 5

☐ 40(5/55) minutes before 5

Statement: It is better for a kid to complete schooling by the age of 18.
Which of the following assumptions is implicit in the above statement?

- I. The colleges do not consider candidates after 18 years of age.
- II. The kid must be admitted to college at the age of 18.

☐ Only (I)

☐ Only (II)

☐ Neither (I) nor (II)

☐ Both (I) and (II)

Five persons went to five different hill stations with their wives on Sunday in five different cars (one is Nissan).

Following points gives some more information of the names of the person and their wives also names of the cars and Hill stations.

- I) Raj went to Agumbe but not in Hyundai car and Shyam is the husband of Asha but they did not go to Kollur.
- II) Murali went to Virajpet and Jansi travelled in Swift car with her husband.
- III) Mamatha went to kodachadri with her husband but not in Hyundai car.
- IV) Neither Sindhu nor Mamatha is wife of David and the couple who travelled in Skoda went to Sagara.
- V) Ramya did not go to Kollur and Virajpet and Vijendra did not travel in Fiat car.

Question: Who among the given person travelled in Nissan car?

☐ Murali

☐ Vijendra

☐ Raj

☐ David

Direction: Read the following information and answer the question that follows.

Five persons went to five different hill stations with their wives on Sunday in five different cars (one is Nissan).

Following points gives some more information of the names of the person and their wives also names of the cars and hill stations.

- I) Raj went to Agumbe but not in Hyundai car and Shyam is the husband of Asha but they did not go to Kollur.
- II) Murali went to Virajpet and Jansi travelled in Swift car with her husband.
- III) Mamatha went to kodachadri with her husband but not in Hyundai car.
- IV) Neither Sindhu nor Mamatha is wife of David and the couple who travelled in Skoda went to Sagara.
- V) Ramya did not go to Kollur and Virajpet and Vijendra did not travel in Fiat car.

Question: Which of the statement given in options is correct about the couple who went to Kollur?

- ☐ The couple travelled in Swift car
- ☐ The couple travelled in Fiat car
- ☐ None of the given statement is correct
- ☐ The couple travelled in Nissan car

Direction: Read the following information and answer the question that follows.

Five persons went to five different hill stations with their wives on Sunday in five different cars (one is Nissan).

Following points gives some more information of the names of the person and their wives also names of the cars and Hill stations.

- I) Raj went to Agumbe but not in Hyundai car and Shyam is the husband of Asha but they did not go to Kollur.
- II) Murali went to Virajpet and Jansi travelled in Swift car with her husband.
- III) Mamatha went to kodachadri with her husband but not in Hyundai car.
- IV) Neither Sindhu nor Mamatha is wife of David and the couple who travelled in Skoda went to Sagara.
- V) Ramya did not go to Kollur and Virajpet and Vijendra did not travel in Fiat car.

Question: Which of the pair given in options is correct?

☐ Raj – Sindhu

☐ Murali – Jansi

☐ Vijendra – Mamatha

☐ David – Ramya

Statement: A foreign tourist was bound and beaten by a group of villagers after the villagers suspected him of misbehaving with local women. The district administration has immediately taken action against the culprits.

Which of the following inferences can be drawn from the above statement?

☐ A foreign tourist was abused.

☐ The root cause of such incidents is language barrier.

☐ The villagers are irked by the presence of foreigners in their areas.

☐ The government generally protects foreign tourists.

Statement: A foreign tourist was bound and beaten by a group of villagers after the villagers suspected him of misbehaving with local team to the spot to take strict action against the culprits.

Which of the following inferences can be drawn from the above statement?

- ☐ A foreign tourist was drunk.
- ☐ The root cause of such incidents is language barrier.
- ☐ The villagers are irked by the presence of foreigners in their areas.
- ☐ The government generally protects foreign tourists.

The prices of apples, oranges, and bananas were in the ratio 3:5:7 in the year 2010 and in the ratio 6:7:8 in the year 2022. The price of apples increased by 230% during the years 2010 to 2022. If the price of oranges in the year 2010 was ₹100, what is the price (in ₹) of oranges in the year 2022?

- ☐ 20
- ☐ 35
- ☐ 160
- ☐ 240

Previous Question

Next Question

Direction: Study the information given below and answer the question that follows.

The table shows the expenditures of Mahesh (in lakh rupees) per annum over the period from 2004–2008.

Year	Expenditures				
	Food	Transport	Housing and Maintenance	Interest on Loans	Taxes
2004	56	20	40	15	60
2005	60	25	50	12	55
2006	65	15	45	10	50
2007	50	20	35	18	65
2008	45	25	55	14	50

Question: What is the approximate average amount of interest per year which Mahesh had to pay during this period?

☐ 14 lakhs

☐ 16 lakhs

☒ 12 lakhs

☐ 15 lakhs

Year	Expenditures				
	Food	Transport	Housing and Maintenance	Interest on Loans	Taxes
2004	56	20	40	15	60
2005	60	25	50	12	55
2006	65	15	45	10	50
2007	50	20	35	18	65
2008	45	25	55	14	50

Question: The amount paid on Transport in the year 2004 is approximately what percentage of the amount paid in the year 2005 on Food and Taxes?

☐ 13%

☐ 17%

☐ 15%

☐ 19%

2004	56	20	40	15	60
2005	60	25	50	12	55
2006	65	15	45	10	50
2007	50	20	35	18	65
2008	45	25	55	14	50

Question: If Mahesh earns Rs 6 crore in the year 2008, then what is the ratio of Mahesh's savings and his expenditure in the same year?

- ☐ 139:63
- ☐ 134:65
- ☐ 137:63
- ☐ 131:65

Directions: Read the passage given below and answer the question that follows. There may be more than one question(s) based on the below passage.

It occurred to me that even though I had been seeing him for several years, I didn't really know him. With a little persuasion, he shared part of his life story. He told how he had been forced to drop out of his school at age 16, in order to support his family. He had returned to school at age 22 and finished high school at 25. He told us he had three daughters, two of whom were school teachers and one of them had her master's degree. He was obviously, and justifiably, proud of his family. The most intriguing thing about David, however, was his age; he was 66 years old and one of the hardest working men I've ever seen. Interestingly, he's our yardman, and his story has several lessons. It reaffirms that we can't judge a book by its cover. His story also proves how you do, what you do gives dignity to any honest labour. Being a yardman might not be lucrative for some people, but it enabled David Smith to support himself and to educate three daughters. In addition, it establishes the fact that the opportunity lies in the man and not in the job. He does good work and he's able to sell his service to others. The major point, however, is that David Smith wanted his daughters to have 'more,' so he gave more of himself for them. As a result, everybody won. It's exciting to think of the kids who will get more out of life because David Smith educated himself and then educated his daughters to educate even more kids who.

Question: What does the statement 'I didn't really know him' mean?

- ☐ Nobody was interested to interact with him.
- ☐ The narrator had never have a word with him.
- ☐ The narrator and the person are not known to each other.
- ☐ That person was reluctant to share his story.

QUESTION 51 GROUP: Technical SECTION: Visualization Mark(s): 1

47

Which of the statements are in-correct about data sources?

48

☐ A DataSource can be an excel or CSV file

49

☐ A DataSource is a set of fields that provide the data for a business unit for data transfer into BI.

50

☐ They are also used for direct access to the source data from the BI system.

51 ☆

☐ A Datasource extracts data from the source system and extracts it into the BI system.

52

53

54

The primary purpose of a gauge chart is to:

- ☐ compare multiple categories of data.
- ☐ show a percentage or value within a range.
- ☐ display data trends over time.
- ☐ show a percentage or value within a range.

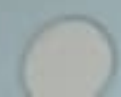

Consider the below Pivot table:

Row Labels	Sum of Amount
Completed	5400
Failed	3800
Abandoned	1200
Grand Total	10400

User has to display the chart as below:

What are the steps the user has to follow to generate/create the chart?

Select the table -> Insert Menu -> select Column Chart option -> select "Stacked Column"

What are the steps the user has to follow to generate/create the chart?

- ☐ Select the table -> Insert Menu -> select Column Chart option -> select "Stacked Column" from dropdown.
- ☐ Select the table -> Insert Menu -> select Area Chart option -> select "Stacked Area" from dropdown.
- ☐ Select the table -> Insert Menu -> select Bar Chart option -> select "Stacked Bar" from dropdown.
- ☐ Select the table -> Insert Menu -> select Scatter Chart option -> select "Scatter Column Chart" from dropdown.
