17. The SOP form of a function

4 Previous Next

The SOP (Sum of Products) form of a Boolean function is $f(A, B, C, D) = \sum m(0, 1, 3, 7, 10)$, where A, B, C, D are MSB and D is LSB. What is the equivalent minimized expression of the function?

Answer Options

Select any one option

Clear Answer

- ☐ $(B' + C)(A' + C)(A' + B')(C' + D)$
- ☐ $(B' + C)(A' + C)(A' + C')(C' + D)$
- ☐ $(B' + C)(A' + C)(A' + C')(C' + D')$
- ☐ $(B' + C)(A + B')(A' + B')(C' + D)$

14. An online learning platform

< Previous Next >

An online learning platform provided less amenities and offers to people who had a monthly membership. Market research is conducted and it is found that the learning platform users are willing to pay a higher price for better amenities and offers. It has also been found that the higher price would cover the cost for these improvements. However, the implementation of this scheme has not been decided yet even though the learning platform is trying to make more profits.

Which of these choices, if true, would most help to explain the learning platform's decision in light of its objectives?

Answer Options

Select any one option

Clear Answer

- ☐ None of the learning platform's competitors offer significantly better amenities and offers to its monthly membership users.
- ☐ The number of people who would be willing to pay the high fares to be a 6 month and 12 month user would decrease.
- ☐ A few of the learning platform's users are satisfied with the service they receive, given the low price they pay.
- ☐ Very few users avoid using the learning platform because of less amenities and offers given by the platform to its monthly members hip users.

2. Find Julian's age

Rob was introduced to his colleague Julian during the founder's day celebration at his company in 2016. Four years later, Rob runs into Julian during the 8th founder's day celebration on 29th February 2020.

If Julian remarks that he is only four years younger than the company's age, what is Julian's current age?

Note: (It is given that founder's day is celebrated only on 29th February.)

On a particular day, a library installed a new clock which gains time uniformly. The librarian observes the clock on a Monday morning and notices that the clock is 10 mins slow at 10:00 AM. She then observes the clock again on the following Monday and notices that the clock is 10 mins 50 seconds fast at 10:00 PM. Analyse the given scenario and determine when this clock will show the correct time.
Note: Select the accurate time in hours and minutes.

4. Capacity of the pool

You are asked to use two pipes P1 and P2 to fill a tank that has another pipe P3 at the bottom of it. It is given that pipes P1 and P2 can fill the tank in 10 and 20 minutes respectively and pipe P3 can empty 12 gallons per minute from the tank.

What is the capacity of the pool if all three pipes working together can fill the tank in 30 minutes?

Note: Choose the option that coincides with the nearest integer

Answer Options

7. Vehicle tracking devices

Mr. Park has two drivers A and B, who drive two different cars. He has installed a vehicle tracking device in both vehicles. On a particular day, Driver B left at 10:00 a.m. heading south, and driver A left at 2:00 p.m. heading north.

Later that day, at a particular time, data was retrieved from both the tracking devices. It showed that, up to that time, A had averaged 60 miles per hour, and B had averaged 40 miles per hour. It also showed that A and B had driven a combined total of 460 miles.

At what time was the data retrieved from the vehicle tracking devices?
