

The community garden has four different plots, each maintained by a different group of volunteers. Over the summer, the groups recorded their vegetable yields in pounds: Group A harvested 150 pounds, Group B harvested 175 pounds, Group C harvested 200 pounds, and Group D harvested 225 pounds. If a new group, Group E, joined and harvested 50 pounds, what would be the new average yield per group?

☐ 120 pounds

☐ 160 pounds

☐ 140 pounds

☐ None of these

The ratio of the ages of the father and daughter at present is 3 : 1. Four years ago the ratio was 4 : 1. The average age of the father and daughter 2 years hence will be.

☐ 36 years

☐ 26 years

☐ 25 years

☐ 24 years

QUESTION 16 GROUP: Aptitude SECTION: Logical Reasoning Mark(s): 1

Direction: Study the information given below and answer the question that follows.

There are 6 types of mirror in a shop A, B, C, D, E and F. Information about their prices is given below.

- i) The prices of A and E is the same.
- ii) The ratio of prices of C and D is 7:6.
- iii) The price of E is Rs. 25 less than that of B.
- iv) The price of D is $\frac{4}{3}$ rd of that of F.
- v) The price of C is Rs. 70.
- vi) The price of F is Rs. 5 less than that of E.

Question: What is the cost of D?

- ☐ Rs. 60
- ☐ Rs. 54
- ☐ Rs. 48
- ☐ Rs. 36
