Question: 6

Statements : All doors are roads. No road is fruit. Some flowers are doors.

Conclusions :

- I. Some fruits are doors.
- II. Some fruits are flowers.
- III. Some roads are flowers.
- IV. No fruit is a flower.

Answer:

- ☐ Only either II or IV follows
- ☐ Only either II or III, and IV follow
- ☐ Only either II or IV, and I follow
- ☒ Only either II or IV, and III follow
- ☐ All the conclusions follow

A number arrangement machine when given an input line of numbers rearranges them, following a particular illustration of input and rearrangement.

Input: 58 95 37 43 64 42 11 12

Step I: 14 58 37 43 64 42 12 00

Step II: 10 14 58 37 43 42 00 01

Step III: 13 10 14 43 42 00 01 04

Step IV: 07 13 10 14 00 01 04 02

Step V: 00 01 02 04 07 10 13 14

And Step V is the last step, as the desired arrangement has been obtained.

Now, based on the above machine arrangement, solve the input given below and answer the questions that follow.

Input: 13 56 66 89 99 23 17 33

What is the difference between the highest and lowest number in step III of the given input?

Answer:

☐ 64

☒ 87

☐ 55

☐ 16

Question: 8

A word is represented by only one set of numbers as given in any one of the options. The sets of numbers given in the options are represented by two classes of alphabets as in two matrices given below. The columns and rows of Matrix-1 are numbered from 0 to 4 and that of Matrix-2 are numbered from 5 to 9. A letter from these matrices can be represented first by its row and next by its column.

Similarly, you have to identify the set for the word given in the questions.

PARTY

MATRIX-1

	0	1	2	3	4
0	P	R	Y	F	Q
1	Q	F	R	Y	P
2	R	Q	P	Y	F
3	F	P	Q	R	Y
4	Y	Q	P	F	R

MATRIX-2

	5	6	7	8	9
5	T	Z	A	G	W
6	Z	A	G	W	T
7	W	T	A	G	Z
8	A	G	W	T	Z
9	G	T	Z	W	A

Answer:

- ☒ 14, 31, 42, 77, 99
- ☐ 00, 66, 44, 88, 23

Station Name	Time (Arrival)	Time (Departure)	Distance from origin(in km)	No. of persons boarding	No. of persons
F	Beginning	7:00 pm	—	30	—
E	8:40 pm	8:45 pm	10	10	20
D	10:30 pm	10:35 pm	25	20	40
C	11:40 am	11:45 am	65	25	50
B	4:00 am	4:10 am	200	15	90
A	7:00 am	Terminates	300	—	200

If bus P increases its average speed by 25% then find the time taken to reach its destination?

Answer:

- ☐ 1:45 am
- ☐ 2:00 am
- ☐ 2:45 am
- ☒ 1:00 am

even numbered cars are adjacent to each other.

Further information related to positions of the car is given below.

The right and left are to be considered as if the driver is sitting in the car and these directions

- (i) Pink colored car is numbered eight which is not in the same row as that of the cars numbered
- (ii) White and yellow colored cars are adjacent to the car numbered six, but white car is not
- (iii) Blue colored cars are numbered five, which is not in the same row as that of the cars numbered
- (iv) Red colored cars are neither adjacent nor opposite to blue or green colored cars.
- (v) Pink colored car is at the right end of the row.
- (vi) The car numbered six is second from the right in its row.
- (vii) Black colored cars are even numbered and are opposite to the car numbered one.
- (viii) Violet and Orange colored cars are parked in the same row. The car numbered six is not
- (ix) The Green colored car is odd numbered but not one and is in the same row with the Black
- (x) Yellow colored car is the opposite car numbered two and is numbered neither three nor

Which of the following is the correct combination of cars parked in the same row?

Answer:

☐ 1, 3, 4, 6, 9

☐ 2, 3, 8, 9, 10

☐ 5, 7, 8, 2, 9

☐ 4, 1, 9, 7, 10

Max Marks: 5

Question: 20

Mr. Alok Bisht is 37 years old and has been a member of the city club for the last 5 years. He has also held the post of the secretary of the city club for the last 3 years. He lives in Chakrata, which is around 70 kilometers from Dehradun City.

You need to take a decision whether:

Answer:

- ☐ The person cannot be appointed as the secretary of the Doon.
- ☒ The person can be appointed as the secretary of the Doon.
- ☐ The candidate has to be referred to the selection committee.
- ☐ The candidate has to be referred to the president of the club.
- ☐ Sufficient information is not available to make the decision.

Question: 14

Tom, Martin, and Garry are suspects of robbing a bank. Only one of them is guilty. Tom says he is innocent. Martin says he is innocent. Garry says Martin is the guilty one. Who robbed the bank considering only one statement is true?

Answer:

- ☒ Tom
- ☐ Martin
- ☐ Garry
- ☐ None of the mentioned

Question: 18

Situation: You are in a heated argument with a friend and both parties are becoming disrespectful and insulting.

Reaction:

Answer:

- ☐ Walk away from the argument.
- ☒ Confront the friend about their behavior.
- ☐ Agree to disagree and end the argument.
- ☐ Continue the argument and insult the friend back.

Question: 11

DIRECTION: Read the given information and answer the following question.

10 cars were parked in a parking lot which are of different colors among red, black, green, white, yellow, pink, blue, grey, violet and orange, but not necessarily in the same order. These ten cars were parked in two rows in such a way that five cars in each row and each car from one row is exactly opposite a car from the other row. The cars were numbered from one to ten and parked in such a way that an odd numbered car is not opposite another odd numbered car and no two even numbered cars are adjacent to each other.

Further information related to positions of the car is given below.

The right and left are to be considered as if the driver is sitting in the car and these directions are as per the driver's left and right.

- (i) Pink colored car is numbered eight which is not in the same row as that of the cars numbered four or six.
- (ii) White and yellow colored cars are adjacent to the car numbered six, but white car is not at the end.
- (iii) Blue colored cars are numbered five, which is not in the same row as that of the cars numbered three or six.
- (iv) Red colored cars are neither adjacent nor opposite to blue or green colored cars.
- (v) Pink colored car is at the right end of the row.
- (vi) The car numbered six is second from the right in its row.
- (vii) Black colored cars are even numbered and are opposite to the car numbered one.
- (viii) Violet and Orange colored cars are parked in the same row. The car numbered six is not to the left of car numbered seven.
- (ix) The Green colored car is odd numbered but not one and is in the same row with the Blue colored car.
- (x) Yellow colored car is the opposite car numbered two and is numbered neither three nor one.

If a green colored car is adjacent to a grey colored car, then which numbered car is opposite to car number four?

Answer:

Further information related to positions of the car is given below.

The right and left are to be considered as if the driver is sitting in the car and these directions are as follows.

- (i) Pink colored car is numbered eight which is not in the same row as that of the cars numbered four and six.
- (ii) White and yellow colored cars are adjacent to the car numbered six, but white car is not at the end of the row.
- (iii) Blue colored cars are numbered five, which is not in the same row as that of the cars numbered four and six.
- (iv) Red colored cars are neither adjacent nor opposite to blue or green colored cars.
- (v) Pink colored car is at the right end of the row.
- (vi) The car numbered six is second from the right in its row.
- (vii) Black colored cars are even numbered and are opposite to the car numbered one.
- (viii) Violet and Orange colored cars are parked in the same row. The car numbered six is not to the left of the car numbered one.
- (ix) The Green colored car is odd numbered but not one and is in the same row with the Blue colored car.
- (x) Yellow colored car is the opposite car numbered two and is numbered neither three nor one.

If a green colored car is adjacent to a grey colored car, then which numbered car is opposite to car numbered one?

- ☐ 18
- ☐ 16

Max Marks: 5

Question: 5

Study the given information and answer the questions that follow.

A number arrangement machine when given an input line of numbers rearranges them, following a particular set of rules in each step. The following is an illustration of input and rearrangement.

Input: 58 95 37 43 64 42 11 12

Step I: 14 58 37 43 64 42 12 00

Step II: 10 14 58 37 43 42 00 01

Step III: 13 10 14 43 42 00 01 04

Step IV: 07 13 10 14 00 01 04 02

Step V: 00 01 02 04 07 10 13 14

And Step V is the last step, as the desired arrangement has been obtained.

Now, based on the above machine arrangement, solve the input given below and answer the questions that follow.

Input: 13 56 66 89 99 23 17 33

What is the difference between the highest and lowest number in step III of the given input?

Answer:

☐ 64

☐ 87

Question: 7

DIRECTION: Read the given information and answer the following question.

10 cars were parked in a parking lot which are of different colors among red, black, green, white, yellow, pink, blue, grey, violet and orange, but not necessarily in the same order. These ten cars were parked in two rows in such a way that five cars in each row and each car from one row is exactly opposite a car from the other row. The cars were numbered from one to ten and parked in such a way that an odd numbered car is not opposite another odd numbered car and no two even numbered cars are adjacent to each other.

Further information related to positions of the car is given below.

The right and left are to be considered as if the driver is sitting in the car and these directions are as per the driver's left and right.

- (i) Pink colored car is numbered eight which is not in the same row as that of the cars numbered four or six.
- (ii) White and yellow colored cars are adjacent to the car numbered six, but white car is not at the end.
- (iii) Blue colored cars are numbered five, which is not in the same row as that of the cars numbered three or six.
- (iv) Red colored cars are neither adjacent nor opposite to blue or green colored cars.
- (v) Pink colored car is at the right end of the row.
- (vi) The car numbered six is second from the right in its row.
- (vii) Black colored cars are even numbered and are opposite to the car numbered one.
- (viii) Violet and Orange colored cars are parked in the same row. The car numbered six is not to the left of car numbered seven.
- (ix) The Green colored car is odd numbered but not one and is in the same row with the Blue colored car.
- (x) Yellow colored car is the opposite car numbered two and is numbered neither three nor one.

Which of the following is the correct combination of cars parked in the same row?

Answer:

letter from these matrices can be represented first by its row and next by its column.
Similarly, you have to identify the set for the word given in the questions.
