Question 1(in brief):

Hints/Solution 1:

Question 2(in brief):

Hints/Solution 2:

Round:

.....

Candidate name:P.Sasya Sri Harshitha

Interviewer Name:not disclosed

One question from OA (A completes work in 30 days B in 40 days and time taken to complete work together)

Asked about my projects

Oops concept

Difference between stack and queue

Difference between array and linked list

given two char arrays A,B need to return whether B is substring of A or not

Candidate Name:Siddhi Tiwari

Questions asked:--

My project

Virtual Functions in cpp

3 questions from Aptitude

Oops concept

Difference between deadlock and livelock

Difference between global variable and local variable

2 output based questions (cpp)

2 coding questions:-

- To check whether a given bit in an integer is set or not set
- substring question

Candidate Name: Isha Jaiswal

Interviewer: 3 people(2 male, 1 female)(having 6+ yrs of experience at NVIDIA) (Name I don't remember)

1. Virtual Functions in cpp
2. Oops concept - Polymorphism, function overloading
3. Struct and union
4. between global variable and local variable

5. Pointer output questions
6. Check whether particular bit is set or not(Write the code as well)
7. What is stack
8. Implement stack
9. Check cycle in a linked list(Just asked how will you implement)
10. What is linked list and doubly linked list
11. Macros function and usage
12. OS concept
13. OS and kernel difference
14. Malloc usage
15. Microkernel and monolithic kernel
16. Projects related questions
Where you faced challenges in project and how you resolved?
17. Process and Threads difference
18. Bootstrap explanation

Note: They helped me wherever I was stuck and at last he asked what do you know about NVIDIA. He asked if I take 90 minutes to go from Patna to Pune and 1 hour 30 minutes back than why this difference. It is same , just to test my patience at the last he asked this question I guess.

Candidate Name: Medha Aggarwal
Interviewer Name (3 people were there)

- 1) Asked if the kth bit is set or not
- 2) Some bit manipulation questions
- 3) Ques that they asked in OA
- 4) OS and OOPs concepts
- 5) How do you manage your time
- 6) Some Project related questions
