Fareye

<https://ideone.com/9SaiUJ>

Paytm

Last non-zero digit of n! - <https://ideone.com/1HD0F1>

Subtract two link lists - <https://ideone.com/PmH7B2>

Superior elements in the array - <https://ideone.com/nEyl3E>

Rotting oranges - <https://ideone.com/eyklqZ>

p smooth numbers - <https://www.geeksforgeeks.org/p-smooth-numbers-in-given-ranges/>

calendar - <https://ideone.com/1jE9y9>

Cisco

Telephone Prank - <https://ideone.com/P48OqK>

Expressive words - <https://ideone.com/GmvBU8>

Coffee question - <https://ideone.com/mSjip0>

Bracket question -

token generator question - <https://ideone.com/l4ikEU> , <https://ideone.com/cCDqEs>

OLA

<https://www.geeksforgeeks.org/arrange-array-elements-such-that-last-digit-of-an-element-is-equal-to-first-digit-of-the-next-element/>

<https://ideone.com/QCQB0S>

Return number of triangles of same color edges - <https://ideone.com/DLdbmI>

given an array which contain price of toffies, and for different queries we are given money we have, and we have to print how many toffies we can choose to buy - <https://ideone.com/2IVu5Z>

Time it will take to type the string in the keypad of phone - <https://ideone.com/J115YY>

SAP Labs

Street light question - <https://ideone.com/NXh6DM>

Manager want to know the id of the items that are bought by all the customers - <https://ideone.com/QZ6cxL>

Arrange Flowers in ascending till index k+1 and then in descending order - <https://ideone.com/CsQgNh>

Oil Transporter. Max rate at which oil can be transported from the root to all the leaves of the tree - <https://ideone.com/hlro8K>

Round robin scheduling. Avg wait time - <https://ideone.com/D5QfCz>

Sort the list in the order of their frequency. If the frequency is same then they should be in the order they are present in the original list - <https://ideone.com/fKdsYd>

Lock question. Find the smallest permutation of the digits of the number such that it doesn't start with zero - <https://ideone.com/IONrnR>

From the given array, return the pallindrome of the numbers. You can add consecutive numbers to make the array pallindrome - <https://ideone.com/SFyMhP>

Town's name is prefix of all citizens' name. Find the town name - <https://ideone.com/QdzG1T>

Lan strength question (max diameter of the binary tree) -

Ariline question - <https://ideone.com/ZxuMae>

Alumnus Dinner question - <https://ideone.com/JRwJDG>

Footsteps question - <https://ideone.com/s2LSlp>

Number of different ways to get the longest consecutive 1s and the max length. Both in one soln - <https://ideone.com/ghQ0tZ> (Not correct for number of distinct ways)

Car and gallon question / Juice energy question. Min number of refueling stations - <https://ideone.com/5JINDf>

Pattern matching question - <https://ideone.com/hTh0by>

Project, module and week where you need to work on different modules in alternate weeks - <https://ideone.com/H8lgT1>

Shortest Job First -

Merge overlapping intervals (Give the total distance covered by the bus) - <https://ideone.com/8Xy27Z>

Computer Technical fault. Min wires to make all the systems active by peer to peer connection - <https://ideone.com/XqBiMd>

Desktop and Laptop question. Count number of consonants in the list - <https://ideone.com/ZzAms8>

Pizza ordered. Return the array storing the min. element in each subarray of size k - <https://ideone.com/0uXx1P>

Cryptic message $(s^n \% 10)^m \% 1e9+7$ - <https://ideone.com/T7WY87>

Walmart

String Match - <https://ideone.com/gHsG93> (Logic - if the difference of the frequency of each character is odd then return false.)

Count Subarrays (Sum of factors) - <https://ideone.com/kax6XH>

Query questions (Segment Tree) - <https://ideone.com/7rBh0g>

Zombie and Robot - <https://ideone.com/Xpn8mP>

<https://www.geeksforgeeks.org/m-th-smallest-number-k-number-set-bits/amp/>

Visa

Compression of string. replacing consecutive occurrence of a character with its count - <https://ideone.com/2fhp2a>

Animal Predator Question. Number of groups such that no prey-predator exists inside a group - <https://ideone.com/R3MCjq>

Longest subsequence which is also a substring - <https://ideone.com/bujy4g>

Largest prefix of the string that is equal to its suffix - <https://ideone.com/jL0XFU>

Last Stone Weight - <https://ideone.com/V7oRbU>

Max subsequence length such that all the numbers in the subsequence increase with the difference equal to zero or 1. - <https://ideone.com/f3e3OI>

Portfolio Balances. Range Addition. Given queries with range of array and value. You need to add that value to each element in the range. After all the queries return the value maximum element in the array. - <https://ideone.com/XITyab> (Approach - $a[i] += val$ and $a[r+1] -= val$ and then cumulative sum after all the queries to get the array and then return max of that array.)

Largest square area with all cell's value equal to 1 - <https://ideone.com/EI9eT8>

Count the number of triplets whose sum $\leq t$ - <https://ideone.com/R19cby>

Count ways to express a number as the sum of consecutive numbers - <https://ideone.com/mT1C1c>

Tiles Arrangement. Keep K 2x1 tiles in nx3 grid such that sum is max. - <https://ideone.com/Z5eMyc>

Max prod of lengths of two palindromic subsequence - <https://ideone.com/jFCNAn>

MTX

Min Cost dam building - <https://ideone.com/EfTeWS>

Microsoft

Min number with no two consecutive digits same - <https://ideone.com/hSqRKR>, <https://ideone.com/wF6t1Q>

Windmill birds question - <https://ideone.com/qV901L>

Replace '?' with 'a' or 'b' - <https://ideone.com/tSmgZs>

Number of vertices in the longest path with alternate characters in the path - <https://ideone.com/xJwZli>

Car Manufacturing with two assembly lines - <https://ideone.com/O3vDnC>

Car pooling question. To return the fuel consumed to reach office - <https://ideone.com/QIRJhg>

Count number of operations to make a string's value equal to zero - <https://ideone.com/y3uX6v>

Storeroom question. Remove R consecutive values from the array such that maximum number of distinct value in array remain left - <https://ideone.com/58RtK2>

Form two square of equal size in matrix
<https://ide.geeksforgeeks.org/BrGavs7acA> , <https://ideone.com/Y7vxZU>

Min. number of characters to delete from string to make it palindrome (permutation allowed)
-<https://ideone.com/M9x8p7>

Retail Question - <https://ideone.com/cKUwKi>

Doctor Patient slot - <https://ideone.com/YFqheF>

Indeed

Unstable Permutation $p[p[i]]$ - <https://ideone.com/ZHQ75p>

Number of ways to divide N into k groups - <https://ideone.com/hL5sRg>

Count number of inversions - <https://ideone.com/cNFRmW>

Caesar Edit distance - <https://ideone.com/rSQH7L>

Question that come - Count the number of distinct substrings

Soln used - <https://leetcode.ca/2020-07-24-1698-Number-of-Distinct-Substrings-in-a-String/>

Directi

Questions

Airport itenary - <https://ideone.com/m0lqQM>

Orange problem - <https://ideone.com/Yx7wRi>

Anagram matching with queries - <https://ideone.com/dm7kK4>

Tree XOR Query - <https://ideone.com/6lnfMA>

Number of max heaps - <https://ideone.com/yrEYP6>

Least root of quadratic eqn - <https://ideone.com/sc2SHG>

LRU Cache - <https://ideone.com/P85JyQ>

Dhani Loans (Indiabulls)

Test Question

- Given a graph with weights, you need to return the product max 2 nodes in the component with the largest size. Each component should only contain the nodes having the same weights among the edges.

Soln approach - It was given that weight can be from 1 to 100 only. Created 100 different unweighted graphs for each weight and then ran dfs on each graph to get the largest component and its max two nodes values.

Mathworks

Test Questions

- Q1 Return the sum of two fractions in the most reduced form. Fractions were given in the form of strings and you need to return the string only. Eg: Input - 1/2+3/4 output - 5/4
- Tom and Jerry Question. Tom starts from (0,0) and needs to pick up all the cheese in the maze and then give these cheese to the jerry at the coordinates (x,y) in minimum moves. It can move up, left, right, down only. Soln approach - Find the APSP and then solve travelling salesman problem.

Suki.ai

It has only 8 engineers.

- Startup
- It has created CRM with ML and AI for doctors and health organizations.
- It does documentation, billing, Order management of prescriptions and various other stuff, Internal communications among doctors and staff.
- Documentation generates lots of data for ML.
- Products - Suki AI assistant (NLP and ML) and Suki Speech Service (like Siri of apple)
- Available on ios, android, web, Windows native app.
- Their clients are US healthcare market (hospitals)

Test Questions

- Q1 Wordset a set of strings having words and sentences were given. You need to find the number of ways each sentence can be rephrased by replacing a word in the sentence with its anagram which is available in wordset.
- Q2 Maximum sum of the subarray. (Kadane's algorithm)

Questions

Eightfold ai

divide by prime factors till both X and Y become equal -

<https://www.geeksforgeeks.org/minimize-steps-required-to-make-two-values-equal-by-repeated-division-by-any-of-their-prime-factor-which-is-less-than-m/>

Navi Technologies

- Startup.
- Lends personal, home loan and health insurance, Asset Management Banking.
- Ceo - Sachin Bansal (Flipkart co-founder), CFO - Ankit Agarwal . Both of them has invested

\$500M of their own money.

- Office - Bangalore
- They have requested RBI to become a bank.
- They create their own MFs on which people can invest.
- Moto - Customer first, customer driven.
- They will hire 12-15 people among all the campuses.
- Java knowledge is preferred.

Test Details

- 120min test. It has 4 sections.

Interviews

- 2 Technical round - Problem solving, HR round.
- 1 Curefit round - Whether you can fit in the organization culture or not. It is to see whether you are a jerk or not.

Types of candidates they need

- Super passionate about what they want to do.
- Entrepreneurial people.
- Take ownership of their work and sees the startup as their own.
- Innovative.
- Long term thinker.

RazorPay

CEO: Harshil Mathur (May 2014–)

Headquarters location: Bengaluru

Founded: 2013

Subsidiaries: TERA Finlabs, ThirdWatch Data Pvt Ltd, Opfin Software Private Limited

Evaluation - 3Billion

Esops are given that are vested over 4 years.

Tests - on hackerearth, MCQs - dbms, os, oops and programming.

Solns - Butterfly/Colors (N,K,X) - <https://ideone.com/TVGz7z>

- Stone Pickup such that all kind of stones are picked up with min cost - <https://ideone.com/ag2Q9b>

- Find two numbers and their XOR and sum is given. -
- 3 more questions in IIT docs

- Became Fintech in 2020

- B2B business

- Works in python, go-lang, PHP, etc. There is bootstrap training.

- 1500+ employees. They have scaled up hugely in the pandemic.

- It is LinkedIn's top 10 startup to work in.

- Razorpay blog - <https://engineering.razorpay.com/> Here they put all their challenges and solutions they came up with.

- Razorpay vs their competitors - <https://stackshare.io/razorpay>
- Student campus hire experience - <https://www.youtube.com/watch?v=RO4SP5gGkCA>
- Interviews - Coding and Designing round, problem solving skills round, Curefit round. Curefit round - to see that you are not a jerk, you are a kind person with whom others can work.

- It is a startup, they need smart people who get things done. They want innovative people as innovations keep them ahead of their competitors.

Startup or Corporate

At their core, new companies and established companies need to accomplish the same basic things. For example, they all need marketing, sales, customer support, product management, HR, and so on and so forth.

When companies are new, they tend to be smaller, meaning they have less people to help accomplish the same basic things. In addition, the people they have working for them are less entrenched in their respective roles. However, as companies mature, they tend to hire more people, and the people they hire are increasingly more specialized in terms of what they do. Because of this natural maturation process, the choice you're making between a startup job versus a corporate job represents a fundamental difference between wanting to be a generalist versus wanting to be a specialist.

If you choose to work for the startup, you're going to wear lots of hats and take on lots of varied responsibilities. This type of work will broaden your skillset, but it will also dilute it. You'll have an opportunity to become knowledgeable about more things, but you won't have the time to focus on any one of them and learn to execute it at an exceptional level.

In contrast, if you continue working for your current employer, you'll have the opportunity to become increasingly skilled at a specific job role. You'll have a chance to become an "expert." Neither choice is good or bad. The world needs specialists, and the world needs generalists. So the real question here is: What type of work do you personally enjoy more?

Do you love exploring new topics and broadening your scope of knowledge? Do you get annoyed, careless, or lazy when confronted with repetitive tasks? If so, a startup environment is probably a better option. The diversity of your work will help keep you engaged and motivated. But what if you love focus? What if you love micro-optimizing a process until it runs as perfectly as possible? What if you struggle to operate efficiently when jumping between different tasks and priorities? If those characteristics describe you, then I suspect you'll prefer a corporate environment.

In other words, if logistical concerns like compensation or job title or location aren't driving your decision, then the thing that matters most is the type of work you'll be doing. Heck, it might matter more than any of those logistical things because it's going to impact everything about your job. Are you going to be happier being a generalist doing lots of different types of tasks and learning lots of different business skills along the way? Or are you going to be happier focusing on one specific set of skills and becoming exceptional at it?

Answer those questions honestly, and you'll know the best choice for you.

Startup hiring pitch

Your company growing at a huge rate. I want to contribute to this growth, I believe it will provide me with vast learning opportunities. I want to be part of something which is going to be big after few years and be a contributing factor to its success.

Versa Networks

- Startup
- Work Hard and Fast
- CTC - 15 Lac including variable
- Additional to CTC - ESOPs - 4000 stocks over 4 years (1000 p.a.), Health Insurance of complete family, term life insurance.

[Eightfold.ai](#)

Job role - Member of Technical Staff

- Head office - California, USA
- 5 yr old startup. Founded in 2016.
- Founders - Ashutosh Garg, Varun Kacholia
- 2 Billion dollars evaluation. Series E funding.
- Hub Tag - Unicorn
- Mission - To help people in finding the best career opportunities with the power of data.
- Their model takes the applicant's career path (Resume) and the job requirement from the organizations. The model engine can predict the next role for the person and what the person needs to do to get the role, like going for an MBA.
- They work on Python, React, Spark, MySQL, Tensorflow, AWS.
- They are only 16 engineers in the company. Hence, you need to work too hard, day and night.
- You can move from one role to another.
- Interview is resume dependent, and it will be harsh and have real depth on the foundations.

IITK Alumni in the organization - Amit Negi (2021) (M.Tech immediate senior)
