Direction: Read the passage given below and answer the question that follows. There may be more than one question(s) based on the below passage.

Will Norman, who is London's cycling tsar under mayor Sadiq Khan, has identified a problem with bike use as it exists in the city. However, it's one where the solution lies primarily with Norman and his boss. In an interview with the Independent, Norman said he worried cycling in the capital was too much the preserve of white, middle-class men. Many might agree. But what Norman omits is that this isn't down to the cyclists – it's a direct product of the streets they are forced to use. The evidence from around the world shows that the safer and reassuring the road infrastructure is for bikes, the greater the variety of cyclists. In the Netherlands, for example, a slightly higher proportion of women cycle than men. In Odense, which styles itself as Denmark's most bike-friendly city, 81% of children ride to school, generally without their parents. These are places that have spent 40 years making streets more amenable to human beings. In contrast, London remains a largely feral and hostile environment for cyclists, despite the arrival of a handful of so-called cycle superhighways. It is a road culture that emphasizes speed and assertiveness, and this tends to put off many but the most gung-ho, enthusiast riders, who tend to be drawn from a smaller demographic pool.

Question: The concern expressed by Norman has the implication that ____.

- ☐ London's road infrastructure is not reassuring for bikes
- ☐ London's road infrastructure is quite reassuring for bikes
- ☐ London has lessons for Denmark and the Netherlands
- ☐ Sadiq Khan is solely responsible for London's poor roads

Choose the option that can be substituted for the given sentence/phrase:

Obsequious shameless display of a servile behavior in order to gain an advantage

☐ Submission

☒ Sycophancy

☐ Devotion

☐ Admiration

What is the measure of the circum radius of a triangle whose sides are 9 cm, 40 cm and 41 cm?

☐ 20.5 cm

☐ 24.5 cm

☐ 6 cm

☐ 4 cm

What is the sum of 100 terms of the series $1 + 3 + 4 + 5 + 7 + 7 + 10 + \dots$?

☐ 6750

☐ 6325

☐ 7225

☐ 5700

Scenario: A project manager needs to coordinate a meeting with team members from different departments. Using Microsoft Outlook, the manager schedules the meeting through the Outlook calendar, inviting all relevant participants. Outlook automatically checks the availability of attendees, suggesting optimal times and integrating with Microsoft Teams for video conferencing.

In the scenario where a project manager schedules a meeting with team members from different departments, what feature of Microsoft Outlook helps in finding an optimal meeting time?

- ☐ Address Book
- ☐ Task management
- ☐ Email filters
- ☐ Calendar availability checking

The features such as Auto-Play Audio and Screen Recording in MS-Powerpoint are present in which of the tabs given in options?

- ☐ Home
- ☐ Insert
- ☐ Animations
- ☐ Recording

Choose the option that meaningfully completes the sentence.

He applied for and was granted legal _____ Labour Ministry.

☐ aided by

☐ aid by the

☐ aiding of

☐ aids of

How many terms of the arithmetic progression 1, 4, 7,... 120 terms and 4, 8, 12,... 80 terms are the same?

☐ 25

☐ 27

☐ 28

☐ 26

What will be the return value of the function Test(1, 1)?

```
int Test(int x, int y)
{
    while (x <= 500)
    {
        x = 2 * x;
        y = x + 1;
    }
    return y - x;
}
```

☐ -1

☐ 0

☐ 1

True/False - Can we create summaries in one workbook when the dataset is kept in another workbook using Pivot Tables?

☐ False

☐ True

		AMONG FIVE DEALERS
JESSE	80	29
JANE	95	19
JACOB	92	23
JASON	85	17
JOHN	96	12

Question: If Jane, Jacob and John mix their solutions into one, then what will be the concentration (approx.) of cedar from the new solution?

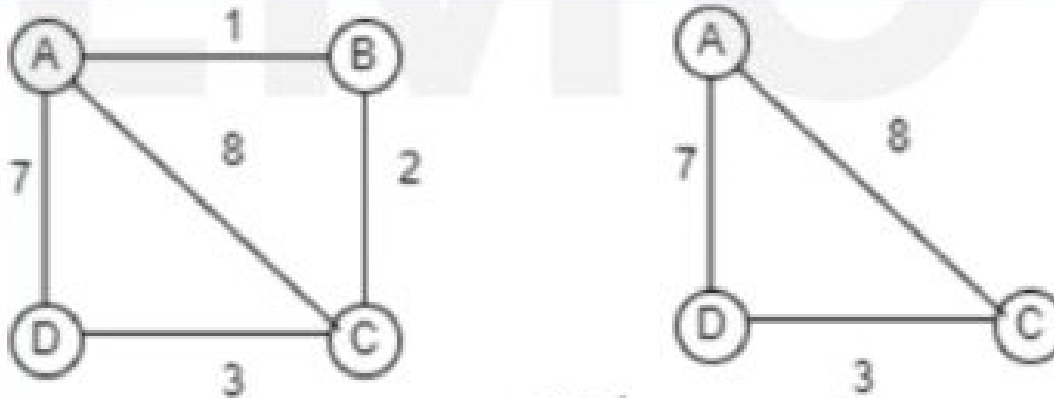

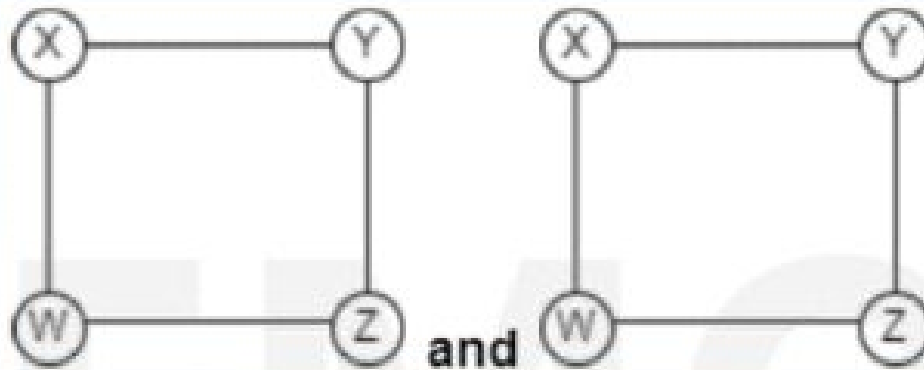

☐ 79%

☐ 95%

☐ 94%

☒ 89%

Identify the proper graph and its MST (Minimum Spanning Tree) pair.

Which of the statement(s) given below is/are not the required condition for binary search algorithm?

I) The list must be sorted.

II) There must be mechanism to delete and/or insert elements in the list.

☐ Only (II)

☐ Neither (I) nor (II)

☐ Both (I) and (II)

☒ Only (I)

Which of the statement(s) given below is/are correct?

I) Circular queue is a linear data structure.

II) Re-buffering problem occurs for each dequeue operation in a circular queue.

☐ Only (II)

☐ Only (I)

☐ Neither (I) nor (II)

☐ Both (I) and (II)

Which of the below given binary tree(s) has the number of leaf nodes that are always equal to the number of internal nodes + 1?

I) Full binary tree

II) Skewed binary tree

☐ Only (I)

☐ Only (II)

☐ Both (I) and (II)

☐ Neither (I) nor (II)

Given:

Find(a, d)

Input: Two variables a and d where a = 0 and d = 10

Output: Prints "8"

Find(a, d)

while (a < 3) // Line 1

☆

do

b ← 2

a ← a + 1

while (b > a) // Line 2

do

a ← a + 1 // Line 3

b ← b - 1 // Line 4

c ← a - b + 1 // Line 5

d ← d - c + 1 // Line 6

while (b>a)

Suresh is preparing a Synopsis for his project using MS Word. He wants to add a "Table of Contents" to his document. Help him to do this in MS Word.

- ☐ Design -> Table of Contents -> Table of Contents
- ☐ References -> Table of Contents -> Table of Contents
- ☐ Layout -> Table of Contents -> Table of Contents
- ☐ None of the options given

```
int Test(int x, int y)
{
    while (x <= 500)
    {
        x = 2 * x;
        y = x + 1;
    }
    return y - x;
}
```

☐ -1

☐ 0

☐ 1

☐ 2

In the sentence below, count the number of times vowels appear.

Despite the heavy rain, the outdoor event continued as planned, with attendees enjoying the music and food stalls.

☐ 38

☐ 35

☐ 36

☐ 37

What will be the output of the program given below?

```
oper()  
{  
    int i = 5, j;  
    j = i++ * 2 || ++i;  
    print(i * 3 || j || i++ * (j / 2 - !3));  
}
```

☐ 12

☐ 2

☐ 1

☐ 5

What does the below given algorithm do?

Guess(a)

Input: A sentence

Output: ?

Guess(a)

i ← 0

j ← 0

while (a[i] != '\0')

while (a[i] != ' ' and a[i] != '\t' and a[i] != '\0')

b[j] ← a[i]

j ← j + 1

i ← i + 1

end while

while (a[i] = ' ' or a[i] = '\t')

i ← i + 1

end while

```

do
  a <- a + 1          // Line 3
  b <- b - 1          // Line 4
  c <- a - b + 1      // Line 5
  d <- d - c + 1      // Line 6
while (b>a)
end while
write(d)

```

Which one of the statement given in the options is NOT correct about the above algorithm?

- ☐ Replacing Line 5 with "c <- a - b + 1" and Line 6 with "d <- d - c + 1" will not change the output.
- ☐ If variables a and d are initialized to 1, the output of the algorithm will change.
- ☐ Replacing Line 1 with "while(a < 2)" and Line 2 with "while (b >= a)" will not change the output.
- ☐ Putting Line 3 and Line 4 after Line 5 and Line 6 will change the output.

What will be the return value on calling the function Test (4)?

```
int Test(int k)
{
    int i, j;
    if (k == 0)
        return(1);
    return(Test(k - 1) * k);
}
```

If a user wants to protect a cell of a worksheet from copying then, which of the following excel features of excel to be used?

☐ Protect Workbook

☐ Protect Row

☐ Protect Sheet

☐ Protect Cell

Consider an array 'T' as given below.

T: 76 23 09 78 91 28 36

What will be the array after three passes of bubble sort if T is sorted in ascending order?

☐ 28 23 09 36 76 78 91

☐ 09 23 28 36 76 78 91

☐ 09 28 23 36 76 78 91

☐ 23 09 28 36 76 78 91

Ques ID: 13692723

Akash started from his house and drove towards West for 2 km after which he took a left turn and drove for 0.5 km. Then, he took a left turn and drove for 2.5 km after which he took a left turn again and drove for 5.2 km. Then, he took a left turn and drove for 2.7 km after which he took a right turn and drove for 1.51 km. Finally he took a right turn and drove for 1.2 km to reach his office. In which direction is the office from his house and what is the shortest distance between his house and his office?

- ☐ West, 6.58 km
- ☐ North-West, 6.29 km
- ☐ North-West, 6.21 km
- ☐ North, 6.21 km

How many numbers of five digits can be made with the digits 3, 4 and 5 each of which can be used at most thrice in a number?

- ☐ 180
- ☐ 270
- ☒ None of the options given
- ☐ 210

 Unanswer
