

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024	M.TECH Dual Degree 5Y	IIT Kharagpur	8.24 / 10
2019	CBSE	KAMAL MODEL SR.SEC.SCHOOL	89.6%
2017	CBSE	KAMAL MODEL SR.SEC.SCHOOL	8.8 / 10.0

INTERNSHIPS

Backend Developer | Desmantle Studio

[MAY'24-JULY'24]

Objective: Building a scalable backend for a **Learning Management System**

- Implemented a **role-based authentication system** using **JWT**, tailored for farmers, ensuring secure access and permissions
- Integrated **YouTube API** for seamless video content delivery and implemented **Razorpay SDK** for robust payment process
- Architected and deployed a **top-tier microservices architecture** for mobile platforms, ensuring scalability and high efficiency
- Automated **CI/CD pipelines** via **scripting and configuring GitHub Actions**, significantly enhancing deployment efficiency
- Dockerized** the application and successfully deployed it on **AWS EC2** instances, ensuring portability across environments
- Integrated **Amazon RDS** for efficient **PostgreSQL** database management, optimizing data storage and retrieval processes

Software Developer | SmartQR Technology | Pune

[DEC'23- FEB'24]

Objective: Integrate **ZOHO CRM** with **Google Cloud Platform** to automate data backup, enhancing data management

- Performed multiple Application programming interface (**API**) **requests** from **Zoho Inventory** for data fetching & it's retrieval
- Automated data transfer to **GCP buckets** using the **Gcloud functions** and **Python modules** to improve workflow efficiency
- Designed a data pipeline for **BigQuery** and created **SQL functions** for analytics, enhancing the decision-making procedures
- Created **Google Cloud functions** for real-time BigQuery updates triggered by GCP bucket changes and **Gcloud Scheduler**

PROJECTS

LetsChat | Web Application | Self Project

[APRIL'23-JUNE'23]

- Developed a real-time chat application using **Django**, including features like private messaging, group chats, and file sharing
- Implemented **WebSockets** with **Django Channels** and **HTMX** to enable low-latency communication and real-time updates
- Utilized **Redis** for fast data storage and retrieval, **improving overall application performance** in live user activity tracking
- Designed a **responsive** and user-friendly interface using **HTMX** for enabling dynamic content loading across all devices

Search Engine | Hackathon | Algozenith

[May 2022]

- Designed a robust search engine for DSA problems using the **Beautiful Soup** library, **NLTK** library, **NodeJS**, **HTML5**, and **CSS**
- Handled edge cases by removing **stopwords** and applied **lemmatization** and **stemming** as essential key preprocessing steps
- Created term frequency and inverse document frequency vectors** to quantify the relative importance of words accurately
- Ranked** the questions using **cosine similarity** and displayed URLs to the top 5 most relevant questions matching the query

Pathfinding Algorithm Visualizer | Self Project

[Jan'22- Mar'22]

- Created a** Pathfinding Algorithm Visualizer using the **React** framework, complete with features like random maze generation
- Implemented algorithms like **DFS**, **BFS**, **Dijkstra**, **A***, **Bidirectional A*** using **JavaScript** and dynamic UI using **TailwindCSS**
- Designed features such as **speed control**, **walls**, and **weight** placement, with adjustable grid size to evaluate performance

COMPETITION/CONFERENCE

- Peak rating of **1675** (Expert) on Codeforces, **1316** (Cyan) on Atcoder, **2231** (Guardian) on Leetcode, **1913** (4 star) on Codechef
- Achieved global ranks of **128**, **334**, **1232** in Codeforces Div3/Div2 rounds competing against 15K participants (**AmAn_kgp_13**)
- Secured global standings of **83**, **320**, and **387** in Leetcode Weekly contest, competing against 15K participants (**viper_2305**)
- Earned global ranking of **479**, **729**, **1120**, and **1156** in Atcoder contest, competing against 8K participants (**Handle: ABDB**)
- Attained global ranks **35**, **46**, and **246** in Codechef Div2 rounds, competing against 3K participants (**Handle: coder_kgp_14**)

AWARDS AND ACHIEVEMENTS

- Achieved an All India Rank of **5242** in JEE Advanced 2020, competing against **2.5 lakh applicants** appearing for the exam
- Secured 19th position** in **Kshitij Overnite 23'** competing against 250+ participating teams and successfully advancing to finals
- Secured a position** in **AlgoZenith Hackathon** for developing a DSA search engine with advanced preprocessing and ranking

COURSEWORK INFORMATION

- Computer Science:** Programming and Data Structures (Theory & Lab) | Operating Systems | Database Management Systems | System Design Fundamentals | Computer Networks | Soft Computing | Machine Learning Foundations and Applications
- Mathematics:** Probability and Statistics | Operational Research | Introduction to Quality | Mathematics-I&II | Linear Algebra
- MOOCs:** Data Structures and Algorithms course (Algozenith) | The Complete 2023 Web Development Bootcamp (Udemy)

SKILLS AND EXPERTISE

- Programming Languages:** C/C++ | Python | HTML | CSS | JavaScript* | SQL* • **Others:** Node* | MongoDB | Git & GitHub
- Libraries and Frameworks:** PostgreSQL | Bootstrap | Django | Express | ReactJS* | Numpy | Pandas | Matplotlib | MySQL
- Software and Tools:** Visual Studio Code | Postman | Sublime Text | Google Colab | Pycharm | jupyter Notebook | MATLAB*
- Cloud:** Google Cloud Platform (GCP) | Amazon Web Services (AWS)* (*elementary proficiency)
